1 What are the four main factors that a solutions architect should consider when they must choose a Region? **1 / 1 point**

- ○ Latency, price, service availability, and compliance
- ○ Latency, high availability, taxes, and compliance
- ○ Latency, taxes, speed, and compliance
- ○ Latency, security, high availability, and resiliency

Correct

A solutions architect should consider the following four aspects when deciding which AWS Region to use for hosting applications and workloads: latency, price, service availability, and compliance. For more information, see the AWS Global Infrastructure video in week 1.

2 True or False: Every action a user takes in AWS is an API call. **1 / 1 point**

- ○ True
- ○ False

Correct

In AWS, every action a user takes is an API call that is authenticated and authorized. A user can make API calls through the AWS Management Console, the AWS Command Line Interface (AWS CLI), or the AWS SDKs. For more information, see the Interacting with AWS video.
