1. What are the four main factors that a solutions architect should consider when they must choose a Region?   **1 / 1 point**

- ◉ Latency, price, service availability, and compliance
- ◯ Latency, high availability, taxes, and compliance.
- ◯ Latency, taxes, speed, and compliance
- ◯ Latency, security, high availability, and resiliency

✓ **Correct**
A solutions architect should consider the following four aspects when deciding which AWS Region to use for hosting applications and workloads: latency, price, service availability, and compliance. For more information, see the AWS Global Infrastructure video in week 1.

---

2. Which statement BEST describes the relationship between Regions, Availability Zones and data centers?   **1 / 1 point**

- ◯ Availability Zones are clusters of Regions. Regions are clusters of data centers.
- ◯ Data centers are cluster of Availability Zones. Regions are clusters of Availability Zones.
- ◉ Regions are clusters of Availability Zones. Availability Zones are clusters of data centers.
- ◯ Data centers are clusters of Regions. Regions are clusters of Availability Zones.
